SMART Board GX Plus for Education

Interactivity you can trust at a price you'll love.

Easy to use, powerful to adopt.

GX Plus integrates seamlessly with your preferred OS, apps and hardware to give teachers a familiar ecosystem that's easy to get started, with no need for additional training.

Only SMART interactive displays provide integrated annotation tools for Windows and Mac OS and a full multi-user touch experience – with **SMART Ink**.

Interactive tools teachers love

Enrich each lesson from day one with **free, essential teaching tools** and software designed for true walk-up-and-use simplicity.

Browse the web, share screens, and use the whiteboard, widgets, and the **Android apps** and education resources teachers know and love – all on an EDLA licensed embedded platform with the **power and security of Android**.

Minimum fuss, maximum peace of mind

Engineered to meet the demands of the modern classroom and backed by SMART quality and warranty coverage, this display is built to offer an intuitive user experience and effortless maintenance.
